-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Specification

This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 12 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In these claims, the phrase “if any” renders them indefinite since the breadth of what is being claimed is unclear.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7, 10-14, 16, 17, and 21 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Suslov (5,843,079). Applicant's attention is directed to Figures 6 and 7 and their accompanying description at beginning at column 8, line 25.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3739

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8, 9, and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suslov (5,843,079) in view of Coucher (3,938,525). Suslov fails to disclose the particular conductor structure. Such a feature is shown by Coucher for connection to a central conductive element. In light of this teaching, it would have been obvious to the skilled artisan to use such a connection in Suslov since it amounts to no more than a design expedient for electrically connecting such an element.

Claims 22, 24, 25, 27, and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suslov (5,843,079) in view of Shaw et al (3,434,476). Suslov fails to disclose the particular couplings and handle structure with switches. Such features are shown by Shaw et al as being conventional in the art. In light of this teaching, it would have been obvious to the skilled artisan to use such features in Suslov since they are no more than mere design expedients for effecting operation of the device. Redundancy of switches to ensure reliability would have been further obvious since it is well known to do the same for such a purpose.

Allowable Subject Matter

Claims 15, 18-20, and 26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lee S. Cohen whose telephone number is 571-272-4763. The examiner can normally be reached on Monday-Friday, 7:00-3:30.
